

Winkit User Guide

(You have to run Main.py to start the program)

Introduction

Welcome to Winkit! Winkit is a user-friendly application designed to streamline the process of inventory management and ordering items for users. This guide will walk you through the features and functionality of Winkit.

Features

1. **Log In:** Users can log in using their User ID to access the application.
2. **Check Inventory:** Users can check the inventory to see the availability of various items.
3. **Order Items:** Users can place orders for desired items.
4. **Log Out:** Users can log out of the application.

Getting Started

1. **Log In**
 - When you run the application, you will be prompted with the option to log in.
 - Enter your User ID to proceed.
 - You will have three attempts to enter the correct User ID. After three unsuccessful attempts, you will be logged out.
2. **Check Inventory**
 - After successfully logging in, you will be presented with a menu.
 - Choose option 1 to check the inventory.
 - The inventory will display the availability of various items.
3. **Order Items**
 - To place an order, select option 2 from the menu.
 - Follow the prompts to order your desired items.
4. **Log Out**
 - At any point, you can choose to log out by selecting option 3 from the menu.
 - This will exit the application and log you out of your session.

Tips and Troubleshooting

- If you enter an incorrect User ID during login, you will have three attempts to try again.
- Ensure that you have a stable internet connection to avoid any disruptions during the ordering process.
- If you encounter any issues or have questions, please reach out to the support team for assistance.

Conclusion

With Winkit, managing inventory and placing orders has never been easier! Enjoy the convenience of browsing items, checking availability, and ordering from the comfort of your home or office.
